

American Cancer Society Webinar

Increasing Colorectal Cancer Screening Amidst COVID-19: FluFIT Program Implementation and Best Practices

Description: This live webinar presentation will include a brief discussion of the epidemiology of Colorectal Cancer, information on screening options with a focus on the importance of screening amidst COVID-19, details about the FluFIT program, and how your health system can implement an effective FluFIT program to increase Colorectal Cancer screening rates.

Tuesday, August 18, 2020
3:00pm – 4:30pm MST

RSVP [HERE](#)

Note: You will not receive an automatic confirmation email after you RSVP. We will send the webinar link to all registered participants prior to the webinar date.

Presenter:

Durado Brooks, MD, MPH

Vice President, Cancer Control Interventions at the American Cancer Society

Dr. Brooks has worked for the American Cancer Society's national headquarters since 2000. He oversees the design, implementation and evaluation of cancer prevention and early detection programs at the national, state and local levels to increase access to high quality prevention and screening, and to decrease cancer-related disparities. Dr. Brooks completed his internal medicine residency and chief residency at Wright State's Affiliated Hospitals in Dayton, Ohio, and practiced primary care medicine for fifteen years at safety net facilities in Dayton and in his current hometown of Dallas, Texas. He completed the Commonwealth Fund Fellowship in Minority Health Policy and earned an MPH degree from the Harvard School of Public Health. Dr. Brooks was a 2015 recipient of the Prevent Cancer Foundation's Laurel Award for National Leadership in Cancer Prevention and Early Detection.
